

STANDARD CONSTRUCTION ITEMS

This list of Standard Construction Items is developed for tracking all the possible pay items covered under the Standard Specifications for Road and Bridge Construction, using computer techniques. A similar list is being developed separately for the Special Provisions items. The first three digits of the Item Number represent the Section Number and the last three digits reflect the sequential number under that Section. The descriptions under Item Description is the title of the construction item. The last column lists the method of measurement for the item.
